Art Charm

Enhance your image with our unique scented ink technology utilizing five scents: Jasmine, Lemon, Rose, and Vanilla.

Book Edging

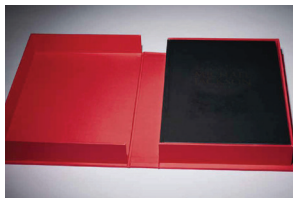

Decorate the cut edges of your book. Gilding is a common practice to decorate the edges of book pages. With edge printing, you can wrap the cover art onto the edge of the pages or come up with a custom design.

Chroma Centric

Increase the performance range of the color gamut by 25% and accuracy by eight times.

Clamshells & Custom Boxes

A one-piece container utilizing two halves joined by a hinge area which enables the structure to close together. Or create a custom-designed box to hold

your project.

Cut-Outs

Add interest and dimension to your books by adding custom cut-outs.

Dust Jacket

Typically made of paper and printed with text and illustrations, this detachable outer cover with folded flaps holds it to the front and back book covers to help protect a hardbound cover.

Embellishments

Applique, Emboss/Deboss, Foil, and more.

Pop-Up Books

Any book with three-dimensional pages, often with elements that pop up as a page is turned. This term also includes movable books, tunnel books, transformations, volvelles, flaps, pull-tabs, pop-outs, pull-downs, and other three-dimensional features.

Sepia

Stably reproduce the classic texture while controlling the cool and warm presentation, increasing the layering by five times and the accuracy of black-and-white works by four times.

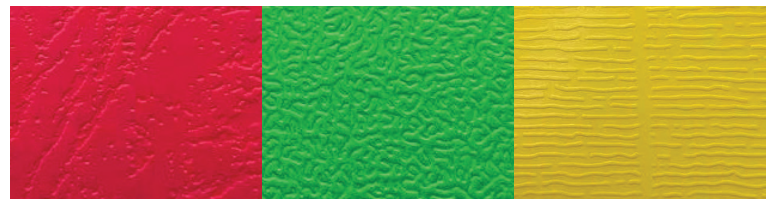

Slipcase

A five-sided open-end box into which binders, books, or book sets are slipped for protection, leaving the spine exposed.

Textured Paper

We offer various texturing options to make your project different from everyone else's.

IF YOU CAN DREAM IT, WE CAN MAKE IT.
